## DETAILED ACTION

This communication is in response to Applicant's Amendments and Remarks filed 14 June 2007. Claims 8, 22, 34, 35, 38, 46, 54, 59 and 62 are independent claims. In view of Applicant's claims, the election to one of the following inventions is deemed necessary. The restrictions cited are as stated below:

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

1. Claims 2-16, 18-19, 22-32 are drawn to a system and method for **producing a webpage** for receiving emails, bidding and sending emails related to an auction process.
2. Claims 34, 46-48 and 51-52, are drawn to a system and method for **producing a webpage** for handling banking information.
3. Claims 35-36 are drawn to a method for **producing a webpage** for accessing stock portfolio information.
4. Claims 38-40 and 44-45 are drawn to a method for **hosting a webpage** for receiving bids via email and then creating the bids.
5. Claims 54 and 58 are drawn to a **system of servers** for handling banking transactions including using session identification numbers.
6. Claims 59-61 are drawn to a method for **maintaining a web site** for auction bidding.

7. Claims 62-64 are drawn to a method for maintaining a web site including non-HTML emails, checking emails and bidding.

The inventions are distinct, each from the other because of the following reasons:

Inventions 1-7 are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, the subcombinations have separate utility such as:

1. producing a webpage - auction
2. producing a webpage – banking
3. producing a webpage – stock portfolio
4. hosting a webpage – bidding
5. server system – banking
6. maintaining a web site – auction
7. maintaining a web site - bidding

See MPEP § 806.05(d).

4. The examiner has required restriction between subcombinations usable together. Where applicant elects a subcombination and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a

Art Unit: 3693

continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

6. As the requirement for restriction among the claims is complex, no telephone call was made to the attorney of record for the restriction requirement. MPEP 812.01 (R-3).

7. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different concepts, restriction for examination purposes as indicated is proper. Applicant is advised that the response to this requirement to be complete must include an election of one of the inventions 1-7 to be examined even though the requirement be traversed (37 C.F.R. § 1.143).

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).

Art Unit: 3693

9. A shortened statutory period for response to this action is set to expire 0 (zero) months and 30 (thirty) days from the mail date of this letter. Failure to respond within the period for response will result in ABANDONMENT of the application (see 35 U.S.C 133, M.P.E.P 710.02, 710.02(b)).
